EDUCATION

Western Governors University

Bachelor of Science in Software Engineering

Austin, TX

2023

Sheridan College

Associate's in Computer Science

Oakville, ON

2019 – 2023

EXPERIENCE

Full Stack Developer

Liimrasoft Solutions LLC

Sep. 2022 – Sep. 2023

Plano, TX

- Developed and maintained web applications using React and Node.js
- Designed and implemented Restful APIs using Express and MongoDB
- Utilized Git for version control and collaborated with cross-functional teams to ensure seamless integration of front-end and back-end components

Software Quality Assurance Engineer

Federated Co-operatives Limited

May 2022 – Sep. 2022

Mississauga, ON

- Conducted rigorous user acceptance testing and quality assurance testing for proprietary software, ensuring adherence to established guidelines
- Enhanced software quality by identifying and meticulously logging defects, accelerating resolution by close collaboration with development teams
- Played a key role in delivering a highly reliable software product, employing strategic testing methodologies and defect management

Web Developer and Designer

HCI Lighting

Sep. 2021 – Jan. 2022

Mississauga, ON

- Redesigned the company website, boosting user engagement by 30% and increasing online sales by 20%
- Implemented and executed effective SEO strategies, contributing to a 25% surge in organic traffic
- Provided leadership by training team members in WordPress best practices

PROJECTS

Chat With Anyone Full Stack Saas | *React.JS, Next.JS, Stripe, Shadcn, Firebase, TypeScript, NextAuth, Git*

- Developed a full-stack SaaS platform that allows users to chat with anyone in their native language
- Employed NextJS and Shadcn for the frontend, optimizing the user interface with client side rendering
- Integrated Stripe payments to enable efficient and secure payment processing, supporting premium features
- Leveraged Firebase as the backend infrastructure, facilitating real time data synchronization

Personal Portfolio | *React.JS, Node.JS, ThreeJS, TailwindCSS, Git*

- Designed and developed a personal portfolio from scratch, using ReactJS and TailwindCSS for the front-end
- Utilized NodeJS for managing dependencies and scripts
- Utilized ThreeJS to incorporate 3D elements for a unique visual effect
- Leveraged Git for version control and deployed the project on Netlify

Car Showcase | *React.JS, Next.JS, TypeScript, TailwindCSS, Git*

- Developed a web-app using ReactJS, NextJS that allows users to browse cars and filter them
- Integrated APIs providing comprehensive data on every car manufacturer, including specifications and images
- Implemented dynamic filtering and search features by leveraging state management and server side rendering
